- Custom Photography Gallery Shots (Included):

Gallery photos are shot to your company's specs using our ever growing selection of amateur male models. Photo sets generally consist of 150 to 200 shots that progress from fully clothed to fully nude, action and clean-up type scenarios. Clients can customize all aspects of the shoot ranging from camera settings, lighting, location, props, ect, or you can leave the creative up to us. Each client has different look & feel type requirements that our male models and photographers work hard to capture. All photos are delivered on DVD in .jpg format, at 72 DPI unless otherwise instructed. This content is shot 100% exclusive for your site and will never be resold.

- Customized Video (Included):

In addition to the still photos, each custom set comes with 25 - 40 mins of professionally produced video included in the price. Video is shot to your company's specs. The video usually follows the same progression as the photos and models usually participate in an interview prior to the action which is a BIG hit with our clients and their members. Just like with the photos, the video is 100% customizable in terms of all technical settings (resolution, format, HD) as well as things like lighting, location, etc. All video is delivered un-edited on the original mini DV tapes.

- Marketing Shots For Your Website (Included):

In addition to the gallery photos, we include a couple eye catching marketing shots in each set that clients can use for online and print advertising. For example, you may choose to use these images in banner ads or in a landing page to help convert web surfers into new members. You may also choose to use these images in a printed publication to drive traffic to your site. However you decide to use them, the marketing shots are sent with your domain name or logo watermarked and are sure to drive targeted traffic back to your site.
